Having troubling getting brenbot to autho authenticate itself.

It connects but does not get auto ops.

Using NickServ authentication :/

```
#--Start Configuration-IRC-----  
# Edit the information below for your setup.  
# At least edit BotName and IrcChannel.  
BotName = Reborn_BOT  
BotFullName = BlazeRegulator/BRenBot 1.30 Win32  
IrcServer = irc.blitzed.org  
IrcPort = 6667  
IrcChannel = #UNREBORN  
#--Q/NickServ-----  
# Enable auth via "Q" or "Nickserv" below. Sample input is shown.  
Qauth = 0  
Qusername = RenBot01  
Qpassword = mypassword  
# Note for Nickserv auth you give the name of nickserv and the full ident string as example  
Nickservauth = 1  
Nickservname = NickServ  
Nickservauth = identify Reborn_Bot PASSWORD  
#--Windows or Linux-----  
# BotMode MUST be "WIN32" for windows servers, or "LFDS" for Linux servers.
```

yes the password is correct :oops: any ideas?

Nickservauth = identify PASSWORD

you don't need the bots name in there, just the password. I take it you have created the nickserv account (I know that sounds silly, but best to check)
