Never happened before I installed Renguard so it's Renguard related.

Renguard Running

1. Game just freezes, after 30 seconds or so it unfreezes and then game ends.
 2. When some tanks fire, especially Stealth Tanks and Mammoths, it sounds like they are rapid firing really fast but are not.

With that second thing, I've always had that problem and I don't think it's Renguard related. What kind of soundcard do you have?

Creative SB Audigy 2 is my soundcard.

Any feedback on the game freezing or does anyone else experience this?

BlazerHeh Muffins has an Audigy too...seems to be an issue with the Audigy cards
I'll write that one off as a Sound Card issue then. Just strange it never happened before Renguard was installed. I'll try reinstalling all the SB software/drivers and see what happens

Thanks
