Ren disconnets alot when i play online. i have Cable and for all the other game when i play online it doesnt disconnect after a period of time. but for ren, i was just playing a few miniutes ago, and than i got disconnected. i dont understand why.

does anyone else has this problem?

How do i fix this problem?

I've heard of a problem like this before, so

- A) This should be in the Tech Support forum,
- B) I remember this being solved, so someone invariably knows what to do.

No, that someone is not me.

I also had this problem. I would play renegade and get disconnected like every 2 minutes, but when I wanted to play Sven's co-op (HL mod) or Counterstrike, I had no problems. Replace your router or surfboard(if you don't use a router). Thats what I did, and now I never get disconnected. In fact, you can probably collect on your warranty unless you've had your current router/surfboard for several years.
