Since no one reads their PM's anymore, and I never see you on IRC, I will post this here Silent_Kane. An admin can move this to a more appropriate location if they wish.

BHS.dll is outputting a file called "wee.log" into C:\. Contained in this file is the timestamped chat logs from all of the clan matches I played today that I hosted. I personally think that this is a great feature, my only request is that it be changed to something like "results5_chat" and be moved to the Renegade directory. Also, the feature should be documented.

Here is a snippet of the file:

[15:18] buhman02: hold on please..
[15:18] snipesimo: got a third?
[15:19] buhman02: I could get a third..
[15:19] snipesimo: k
[15:19] snipesimo: brb
[15:19] snipesimo: back
[15:19] snipesimo: sorry
[15:19] buhman02: Is kimo coming?

I like it though, any chance of cleaning it up and documenting it then making it a feature?
