If you're joining your own RG server on a local IP (i.e. within your network), you need to add your nick to ssc_ignore.txt

HELP
I can not find this file ssc_ignore.txt everybody keeps talking bout.I installed brenbot 1.35 and that file is not in there. I need help setting this up cuz my server is on the same network as my game machine and the server keeps kicking me.

scc_ignore.txt

was that too hard? :rolleyes:

i did that :rolleyes: I found what the problem was. ssc_ignore.txt does not work on a pure renguard server only a non-pure server.So i guess it will just have to b a non-pure sever,better than nothing. Tkx though.
