haha, actually I wanted to make is as easy as possible to leech maps that is why all scripting is dissabled on the server even webalizer. The layout is not great, but simple fast loading and to the point.

Now that's something I didn't know and by that comment I mean that there was a clan called UN. Today I learned something new. It will go to my journal K?

IceSword7Full clan yet i have never seen you play...eve... :rolleyes:

yup yup ice

You aren't a clan if you just sit around in mIRC all day talking about the game, kicking people from your servers for pointless acts, and making websites.

1. You dont need a website
2. Get on renegade and play some games.
3. talk to me on ren if ye want a clanwar

I have to agree with cow. He was good for a little bit though and now he's back to being a moron, although I'll admit not nearly as bad as he was pre-ban.

P.S. 1337th post

P.S.S. I'm back! Fucking EAX.

I have my reasons. There was this whole fiasco and him just being a complete and utter moron. He hasn't been as bad, but lately he's been going back towards his old self.

The reason why the site isn't working is because Ty decided to make it have a sound load (Eminem - Square Dance). <http://www.digitaldepiction.net/forum> works though.

need any help creating a website I bet I can..

I code in ASP though, and I have noticed that most clans use linux servers. (Which is php only, my php ain't as good as my asp....)

Guess linux servers are just cheaper than windows....

And if ya wanna know what I can do try <http://www.soopskins.org> I own and run that site...as well as others..

10x better forum than these php forums, and 100% more secure. Heck are even working on migrating ppl over to it from phpbb forums.
