Yeah, same for me too.  
the RG Locator Module at my site, which searches for everybody on the RG network with with the Tag "TFW" in them isn't working.

---

I just connected to the RG network, and still it doesn't work.  
I even tried the locator on the rg site, and still nothing.

Whats going on?

Andy

The database is severely behind... I just discovered it. I'm debating a couple courses of action because it's taking it's sweet-ass time catching up.

Edit: The database that this information comes from is just a read-only database that the RenGuard network creates. It does not infer a problem with the network itself in any way. It's only the web functionality that's affected.

Agh, so that explains why it shows some TFW members and doesn't show some.  
I kinda noticed that it was working today for others except for me,  
thanks for the info crimson.

Andy.
