Hey all, Need help from 1 of the pro people please, Ive had a look through google and different forums but can't find anywhere that tells me how to modify and what mip settings to save reticles (aimers) for renegade, ive tryed the normal texture (skin) mip settings but it only makes the reticle invisible ingame, any help greatly appreaciated, Thanks

just keep testing the different Alpha settings(in the nvidia window) when you save your dds. Thats what I normally do if they appear blank in game

I think I've done everything right but when I try to use it ingame it shows as a big block, and when i re-open it instead of no back ground it is now all white, any sugestions?

Edit: Im using paint shop pro 8 if that helps.

Scroll down on that link that I gave you. If you follow that tutorial, it should work.
