[BBFDarkKnight]Server specs..

---

2 server types.. WE DO NOT promis what server type you will end up on, but it will be what ever is less full and runs there server the best.

P4 2.8 with a Gig of ram and 10mb/s (1.25MB/s) connection

or

Dual Xeon 2.8 with 2 Gig of ram and 100mb/s (12.5MB/s) connection

TS server is dedicated to TS so chat will not go wonkey during game map loads...

Server then links to a Fiber backbone, that has 12 OC3 and 4 OC48 Connections.  
there yea go

---

He aslo said this...

Quote:Game Servers are unlimited Bandwidth, and max number of games on a P4 box is 3 \*some companies will cram on 6\* and max number of servers on a Dual Xeon is 4-6 (depending on the game) \*most companies try to cram on 12-16 games per dual xeon box.

What the hell?

I couldve SWORN i replied in this thread that <http://www.ServerMatrix.com> is a good company for renting dedicated (game) pc's.

Oh, nevermind, i was confused with one of my other replies in an other thread

[BBFFoss]It has my recommendation, My clan runs on one of these servers and we almost NEVER get lag.

It has your recommendation because it is actually good or because you're part of the clan that hosts it?

I'd rather host my own server. 8 players for free is good enough for me.
