Does anyone have public scripts for servers like weapons drop and veteran system and destroy airstrip for snipers servers. I am setting up my new sniper server and it would be nice if someone supplied the links for me.

Is there a specific reason why black-cell doesn't share other than the fact they are immature.

Give me one good reason why I should go through the trouble of releasing hard work to people who view me as being "immature" and the network that I am very much a part of as being the worst thing to come to this game.
