you cannot run Renegade and your FDS at the same time on the same computer. You must start renegade first and then your FDS.

Dont run renegade and a dedicated server at the same time. The name Dedicated Server is abused way to much by people on renegade. Thats why there is so many slow overrated servers on renegade.

A dedicated server is a server ment for hosting other players not playing on. If your going to run a dedicated server dont run renegade at the same time. Unless you have a gig of ram
