Has anyone given any thought about running Windows XP SP-2 and the FDS? Has anyone tried the SP-2 beta with the FDS?

Majjin Vegetahaha i installed SP2 today so far everything works fine.. and the SP2 has some nice features in IE like pop up blocker it catches the ones googlebar misses

Google toolbar owns

I dunno if i will install this SP2, things work as they should and the motto is: dont fix stuff that aint broken or it will be.

As far as i am aware, the SP2 is an assembly of all past 'updates' that have been put into a single SP\* pack to make it easier for people to install a fresh copy of XP.

If they didnt do this you would have to redownload all the patches seperately in order to update the system.

Both SP1 and SP2 have patches that were not publically released.

I also run an illegal copy of xp pro corporate edition. I have installed sp2 and have not had any problems till last week. renegade kicks me out of the game at randon..

[02] Welcome to RenGuard , achingwan!

[02] To launch Renegade, please click 'Renegade'.

[02] Bad/Corrupted file data\always.dbs has been found in your renegade directory

[02] Bad/Corrupted file data\Always2.dat has been found in your renegade directory

[02] Disconnected from RenGuard network

I uninstalled renegade and reinstalled it but still the same problem
