Either use the Scripts.dll version 1.9.1 release or use the SSAOW version 1.3 release.

Scripts.dll 1.9.1: <http://web.black-cell.net/scripts19.zip> OR
<http://www.sourceforge.net/projects/rentools> - First one just has the needed files, second one has the source code included.

SSAOW 1.3: <http://web.black-cell.net/ssaow.html>

All files go into the Renegade folder on either download.

How would we use the bhs.dll with your CTF/Sniper/Infantry mod vlok?

He's saying you should use those other scripts instead of bhs.dll.

bhs.dll requires scripts.dll 1.9.1 to work with the FDS. His updated ssaow has support with scripts.dll 1.9.1 and bhs.dll. So what he was trying to say is in order for bhs.dll to work you have to have either scripts.dll 1.9.1 or his ssaow mod.

Vlok answered my question in the server owners forums already.

SSCTF 1.3 also supports bhs.dll.

Is BHS.dll only available from Renguard or can it be downloaded separately?
