Yeah same here....It's not being caused by renguard, BR .Net, or Brenbot though.

Thier are many exploits, best to defend against as much as you can
I can tell you the one that is going on is not something your average joe can do. This is some script kiddie with a botnet just flooding wol.

This effects you in 2 ways:

1, your sfps will drop

2, packet loss on your server and lagging

People will think your server sucks but in truth, wol is just getting hit.

Well then I guess someone needs to either take care of this scriptkiddie, or maybe it's time to move the servers to GSA or maybe even something like XWIS?

Alkalinetrust me ren will be dead before the move to xwis or wol happens..

If I'm not mistaken, there's still a decent group of people left that like the game and hope to continue playing it for the rest of their human lives

Btw. It ain't dead untill I say so
