If it's been in the last 24 hours or less, WOL has been kind of 'ping-ponging' alot between being online & offline.

Hope I helped...RenGuard DOESN'T mess with your connection, I've used it long enough to know so

Renguard does not interfere with Renegade connection to WOL/GSA/ASE
Its just a simple 3rd party program running along side Renegade.

Think of Renny as being a Car Driver and RG being the passenger in the car. Nice metaphor

Very nice metaphor to show how RG works

I was having the save problem, thinking it was Rengaurd also. So its just the server then, nothing else?

Anyone have an idea of when this will be up again? I've had to get my fix through Gamespy
