Can anyone make a pistol skin that looks like the SOCOM Pistol?

If you need pictures, i'll send you some files.... just Private Message me... no viruses please... i get enough of those from my friends....

Thanks

You'd also need a different model, since the Mark 23 SOCOM is very different from the Renegade pistol.

you "could" although, just skin the actual gun without all of the "goeey" stuff modeled on it.

without attachments & mods, this is a standard SOCOM MK23

Oooh, nice trick, can you pull anything else out of your ass?

The LAM unit was made into two seperate attachments, one only had a more prominent laser, the other just the light.

no, i am just clearly stating how far your light sticks out.

glyde51: if you ask sir_phoenixx real nicely, maybe he would, but that is probably for RenAlert,

and it would also kill your RenGuard if you used it as a mod.

It wasn't made for RenAlert. (You can take a look at the description.)

ok then, those pics where not on the original site.

thanks for clarifying the nipple usage.

could i recommend you to model in the laser piece as well? would make the front look better IMO

No it isn't boned. I can do. But first I ask my friend for permission, becuse he helped me much with the texture. So he has got some claim of the gun :rolleyes:

That was my shot at it. It didn't come out that great but I learned alot about texturing.

Edit: It looks cooler in Wallpaper form, so check it, here.

Ew, just ew.

Nice models.

In the words of Thepostman: "I think I'm going to bone the milkman later today"

For some reason Boning jokes, about good boners and boning stuff just never get old.

shweet models, really. =D
