I wonder if it's the WChat program in the FTP server.

It is :rolleyes:

Also, Motoxpro, about the only way you're gonna be able to reinstall the Westwood Online Shared Components to fix the prob is from Renegade disk 1 - or, you could always have someone copy their Renegade CD1 to their computer, then compress it and send to you.

No matter what though, the only way you're going to find the WOL Shared Components for Renegade is on the Renegade disk 1 - I'm glad that I have 2 copies of Renegade

Put your renegade cd in your CD ROM, let auto run play, then explore CD click on Setup.exe, dont install the game, just check "Install Westwood Online"

It's ok really, I do that from time to time. I usually correct myself alot if I find I made a mistake in a post - though it's usually within 4-5 minutes, if I find any mistakes with spelling or anything
