I have no idea why, though I've had that problem too.

I believe it has to due to the fact that it won't show you until you've been on the network for two hours. It's like a radio station on how they have a delay. It'll show you on it 2 hours after you've connected.

wtf!?, 2 hours 0.0

I have a rule on my server, where if you get accused of cheating, and your not running RG, you can banned, with no questions asked,

i dunno about my mods, but i have been checked if they are running RG via the website locator
