I like having Renguard tell me when the server I'm on is protected by renguard, but I would much rather have a simpler sound effect to notify me. Is there any way I can change the default sound effect? (You've just connected to a Renguard protected server)

It's really, really loud and it always seems to happen right in the middle of an important ts conversation.

Open up RenGuard, click on options, uncheck the option that says "play renguard sounds", hit ok. I think that should do it.

I don't blaim him, sometimes your parents are asleep and you don't want to wake them up without re-adjusting the volume constantly.

Heheh, yeah it's too loud. It's worst with headphones, if you forget to take them off of your ears when you join a Renguard server, you're not gonna hear anything for a while (And if you're lucky, you'll pass out before getting the heart attack )

The sound is like 300% louder than normal game sounds.

Well at least it WILL let you know when you have joined an RG server, unlike if you used some quiet beep.
