A few weeks ago Crimmy said a few weeks. So anytime now in the next few weeks it should come out. It's better that they don't put a release date on things. This way we'll get a program that is ready for release and not just thrown together to make the release date (eg. Windows Me)! Be patient remember all these people VOLUNTEER their time and knowledge for these projects. By the way thanks BHS and all others involved in the building and beta testing of CP1!

why is it that whenever somebody asks what is going on with something, like how come a model hasn't been approved, a patch isn't out yet etc.. people have to come in and say "omg dont ask be patient they volunteer to do this stuff so show some appreciation" ffs, when was it wrong to ask about something? it's not like we're saying "you guys suck, you said X would be out in Y days, now it's Y days and it still isn't out, omfg".

all that aside, if you say something will be out in X days then when it comes to X nothing comes out, you can't expect people not to say anything (when they've been eagerly anticipating it anyway).

I have never heard a date. All I've ever been told is it will be out in a few weeks.

jonwil is attempting to prepare a (open) beta. we're still in need for a few ws map fixes - they may come into CP1, or CP2, depending on how long it's going to take.
