can anyone help me i start up bren and this error comes up..

Starting up renrem thread...

BRenBot 1.35 linux.

brenbot is Copyright 2003-2004 by Blackhand Studios. All Rights reserved.

ERROR: Notify must be either page, msg or off

Died at renguard.pm line 82, <FILE> line 17.

[root@new brenbot]#

Subject: BrenBot Error on Linux...

[View Forum Message](#) <> [Reply to Message](#)

1) Do not run it as root, that's stupid

2) edit renguard.cfg and set notify to msg.

3) be sure not to edit it on windows, or do dos2unix afterwards. brenbot does not like windows-linefeeds.

You never run apps as root. For all you know, they can be malware, and destroy your whole system. That is an unspoken linux rule.

lol, fair enough

guess they dont trust BrenBot eh?

chadistehradstfu STUPID.

I just had it on there to test. ass

Try to act nice instead of being an ass about it and telling ppl to "stfu".

lol your oldschool tomten. i remember you.

anyways, i come post a problem, and get called stupid for 1 lil thing.. its no longer on root.. so night's ass can stfu.

its working fine now.

Can yall answer questions not related to brenbot?

If so .. im running renegade on linux on a p4 3.2 ghz gig ram... and the sfps will not go above 50....

anything that can help me get them to the max?

If so .. im running renegade on linux on a p4 3.2 ghz gig ram... and the sfps will not go above 50....

anything that can help me get them to the max?

Set netupdate rate from 7 to 30(max) maybe?

edit:

ppl with low b/w may complain that changeing the netupdaterate will make the game laggy for them.

chadistehradlol your oldscool tomten. i remember you.

anyways, i come post a problem, and get called stupid for 1 lil thing.. its no longer on root.. so night's ass can stfu.

its working fine now.

wtf? i asked why it was stupid....

it was mac that mentioned it was stupid :rolleyes: , i just asked why

Well ive messed with the netupdaterate.. ive put it from 10 to 30..

Does it take a couple games for it to kick in? I did restart the server after i changed it.. but it max's out at 50 :S

I dont understand. It should max at like 62 am i wrong?

unless its different on linux. But on windows it max's at 62... How do i get it to max?

[View Forum Message](#) <> [Reply to Message](#)

ok thats what i figured... cuz i had it hosted on amd 2200+ windows for awhile..and it was 62 steady..

moved to p4 3.2 ghz and its 50 steady.. so ya.. thanks guys

running kernel 2.6.x improves SFPS performance .. my servers run at 56sfps max now, instead of ~50

Subject: BrenBot Error on Linux...
Posted by [chadistehrad](#) on Mon, 27 Sep 2004 05:12:18 GMT
[View Forum Message](#) <> [Reply to Message](#)

Can you tell me where to get this?

Its not me thats running the server.. its my friend.

lol ya so i have not a clue what kernel 2.6.x is.. thanks for the help
