I know RG doesn't contain any viruses,
I'm just the message boy...
http://www.conquerworld.me.uk/forum/forum_posts.asp?TID=1146

You don't have to register, reply here, as I will be making a link to this post there
He can look here for an answer.

Cheers,

Andy.

This file is part of renguard and is detected as a virus by some scanners, (When I first installed renguard I had this problem, just set an exception in PC Cillin or whatever AV software you are using)
Please disregard.

It is NOT a virus. Just a file rg uses. :mrgreen:

EDIT:

Known AV Software to detect SVKP.sys as a virus:

Trend Micro PC-Cillin 2003 and Older (Outdated pattern files).

AVG Anti Virus Free AND Professional editions 5.9.x.

McAfee (Unconfirmed on versions, only had 1 to test with)

Norton AntiVirus 2002 - 2003 - 2004 With outdated virus definitions as of 4/18/2004.

* I will add to this list as I have the opportunity to test more.

glyde51it says svkp retard, not RenGuard
Don't you call me or Teaser a retard!
Prick.

Many Thanks Kholdstare & Crimson!
I'm sure your replies are appreciated!
They are by me anyways

some times anti-virus software tries to be smart and really does stupid things...

e.g. I use Norton Antivirus and it picked up teamspeak's keypress.dll as a virus :rolleyes:

Obviously this is not true and norton refuses to do anything even after the teamspeak personel contacted them.

I don't see that there's anything we can do about it. It's an essential file that has to be used.

So basically at the end of the day, it has nothing to do with RG (the prob), but it is just the antivirus being ghey?

Thats al I need to here
