LOL! On a serious note though, I know nothing about horror movies. If you want a game to scare you though try System Shock 2. You can fetch it at the Home of The Underdogs site.

Ok I would reccomend "What lies beneath". That was pretty scary for me

Either that or "House on Haunted Hill" which had a sort of crappy story but it was pretty violent and morbid.

System Shock 2 is a free, full game now... or so I believe. It's badass though, so get it. Get the detailed model replacement addon too, makes it even cooler. Yeah, not much gets cooler than that.

Guys, I can't play system shock 2 because it says:

ERROR: Direct 3d device driver does not accuratley report texture memory usage. Contact you 3d accelerator vendor for updated drivers.

Any idea on how to fix this?

The Thing from 1982.

Quote:An American scientific expedition to the frozen wastes of the Antarctic is interrupted by a group of seemingly mad Norwegians pursuing and shooting a dog. The helicopter pursuing the dog crashes leaving no explanation for the chase. During the night, the dog mutates and attacks other dogs in the cage and members of the team that investigate. The team soon realises that an alien life-form with the ability to take over other bodies is on the loose and they don't know who may already have been taken over.
