Is it possible to recive the Beta as a Downloadable installerfile for thos who don't have a fast con?
So a freind can DL it for me and burn it on a CD.

No standalone downloads are supported atm

<http://www.blackhand-studios.org/cp/patchall.zip>

The downloader that is launched from RenGuard will not download the file, if its in the same
directory - ie your renegade dir

This test is to test the core patch downloader, and its ability to download the nescessary files - do
not say "SUCCESS" on the beta test if the original download process fails for you in any way.
