Hey,
When I log onto WOL, all game servers have gone!
At first I thought it was something I did, so I re-installed renegade.
How do I know if its because of CP1?
Well...
After I re-installed it I did the following:
- patched it to 1.037
- loaded game.exe & logged onto WOL with no problems!
- downloaded RG 1.03
- loaded game2.exe & logged onto WOL with no problems!
- Loaded game.exe which launched RG
- RG Downloaded & Installed CP1
- Loaded game.exe/RG & logged onto WOL, but with no WOL servers?

Any help would be much appreciated!

Cheers.

Andy!

Posts the contents of the language.exe program, the error lies most likley there.
