I can't connect to WOL, it always times out. Sometimes I get a server list, but then I get a version mismatch when I try to join. I can join games on GS though(which I have been at least a hindrance to the enemy team, I took out the same player 4 times with the same Gatling BH)

Anyway, everything is patched and it was working fine until yesterday.

For those interested:

Athlon XP+ 1800
