Would it be possible to add a funtion to the fds that can be used with BRenbot for example to add wildcard bans on WOL IRC?

To block certain bots from joining the channel on WOL IRC for now you have to join the server as "nick*" and then !kick them from the game. This will make the FDS set mode +b nick*!*@* on the channel in WOL IRC. The shitty about this is that you have to do this everytime the FDS is restarted. So for several bots that are on WOL IRC you have to rejoin the server with a wildcard ban mask and kick yourself everytime.

Would save alot of trouble if you could issue a command to make the FDS send a ban to the WOL IRC to prevent certain nicks from joining the channel
