any one got an IRC bot, when a player joins, if PM's them a message like "Welcome to <servername>, enjoy your visit!"

any one??

I believe most server bots now include this. I know for a fact CS does.

he asked for an mirc script, nor for a bot

Here is it:

example:

Welcome to our server UESCat998 ! WOL-R@nk: 1000

Download:

Does anyone know of an mirc scripting for dummies site or tutorial. I'm not really interested in writing a script just how to install and use them. Thnx

It's very easy:

Copy the file into your mirc directory, then run mirc, connect to the server,
join the channel and type /load -rs <filename>

That's it
