i signed up for the cp1 testing, and when i started renguard up, it downloaded just like it should, everything worked fine, now a little while after that, i got a virus and had to format my harddrive, now i cant get the cp1 again. i think a easy solution to this would be for renguard when it starts up check to see if you have cp1 installed, and if not, it downloads and installs it. so as of right now, i can't get cp1.

There is a registry setting that will let RenGuard know if the CP1 is installed or not, you can change it to cause RG to download the patch again.

ok, but you see, i downloaded it the first time, then reformated my harddrive since then, so according to my computer, i have never downloaded it. but, according to the online database or whatever you use, I have, because i signed up for it, but i cant sign up for it again beacause i allready signed up for it once and it wont allow me to sign up twice

Okay I believe I fixed it. You should get cp1 the next time you log into RenGuard.
