Captkurt1 got banned apparently for doing foolish things. Now he had came back as "BrotherJim." BrotherJim, SisterSue? It's pretty obvious the others are him as well. As for him calling me unprofessional in other topics, I'm man enough to talk crap about people with my regular screen name. I don't make them up to make myself look like I'm right. That's for you to decide. Another lamer... Exposed.

Any one that post a negative about acks maps, he blames on me or some one else. I did do one

to get banned from this forum either. Only one name was mine, ack just needs to face it. A lot of people don't like his maps. Not talking about the ones Westwood did and he added some of his errors too, but only his maps. So ack get over it. Your maps are tasteless! I'm not jealous; I know I

bad remarks toward your maps as not real. Get a life. And by the way I did not add this humorous

has to say about that. [October 01, 2002, 08:22: Message edited by: BrotherJim]

But that's not the issue. A lot of people

Here's the issue. You can't blame all bad remarks toward your maps as not real. Get a life. And by the way I did not add this humorous sig at the bottom, Ack added that and then had me blocked

and your ghey censorship of yourself with "?ss" with different names is pretty d4mn obvious - you

did it.I got you banned from the forum? No, buddy, you got banned for being an ass0le and spamming to be a Commander.Oh yes, I added my errors to Westwood maps, I'm so evil... You don't know anything about what I did beyond what I said I did. You're ignorant. You're mentally inept by talking about things you know nothing of.And my maps are tasteless? Oh, that's right, they have to start with "Sniper" or "Snipers" and have the enemy spawn in your base to be worthy of you. Now if you're able to do better maps, why haven't you? About your funny signature - how could I have added it? I don't know your password and I can't lock profiles, only Delphi or another administrator can. Apparently he doesn't like you either.

ACK. Please do us all a favor. Delete this post. It is OK, I suppose, to have it in the General forum, but to have it here too, and argue with people... C'mon!!! It is only in the way of real modding issues. [October 01, 2002, 19:57: Message edited by: steggyd]
