We have launched the final cp1 test. RenGuard is rolling out the patch to every tester again.

This includes the final loadscreen, and the mapfixes.

We are not expecting any bugs in the installation.. if all goes well, CP1 will be live within a few days.

Note: if the renguard pre cp check fails for some reason (some map not right etc), the installation will NOT start again next time you restart renguard.

You'll need to follow the instructions how to reinstall CP1 - ie reset patchversion to 0

This is what being a beta-tester is all about, having fun....

Good work Black Hand Studios

[02] To launch Renegade, please click 'Renegade'.
[02] Starting Core Patch Pre-Install Check..

10 minutes later...

whats it supposed to do ?

Check the 'How to reinstall CP1' Thread if that helps.

It downloaded via renguard and Canyon is totally fucked now, if the map is loaded, renny crashes to desktop, I had to replace it with an earlier version.

I have heard of 2 other cases of this since I downloaded it.
