The update is I have now replaced the spinning animated EVA logo in the main menu as well. I have updated the zipfile or you can just grab it yourself via http://cncrenegade.info/blazer/if_evagizmo.w3dJust throw that into your data directory What is it? You will have to get it and see...it fits the main menu though   ----- origional post ---------Okay the weekend is drawing near, and I know how people like to try out new stuff on the weekends, SO I

feature of Renegade is that it can use MP3 for *ANY* game sound, if you put a RIFF header on it

Changes made to Main Menu, Load screens, and Game Sounds (Boink, Purchase, GameOver, Building Destructions, Vehicles and 1 Weapon). Don't worry, the origional sounds are still there,

like, just remove the files. **Users of BlazeRotate will have to obviously disable rotation of these

probably do more work on this or agree to contribute it towards a TC mod if there is interest. Be warned that these are not normal wav files, so if you try to splice them or edit them with a normal editor bad things will happen.Let me know what you think, any problems, etc.http://www.cncr enegade.info/blazer/Blazer-SimpsonsTheme.zip [October 04, 2002, 02:03: Message edited by: Blazer]

I like it, it adds needed hummor to the game. The background screen on the main menu looks great, esspecialy the rotating Simpson's logo. The only things I see wrong is that some of the sounds are hard to hear/understand and there just needs to be more of them! Besides that, great job! I love it. I would fully support you if chose to make a TC Simpsons mod! Good work!Triforce [October 03, 2002, 13:23: Message edited by: Triforce]

Still having trouble? Nobody else is AFAIK. Make sure you unzipped it to your Renegade/Data folder.
