It has an option to auto launch renegade for you...otherwise it just loads the renguard app/browser.

And you can start Renegade by pressing the "Renegade" button in the lower left corner.

They say here:

<http://www.renegadeforums.com/viewtopic.php?t=9790>

that:

"I just came across a new little "bug" with TSKHavoc.

He reinstalled his whole renegade as i described here but somehow the RenGuard

"Main Startup Window" wouldnt showup, it kept minimizing itself automatically :S.

Anyway, if you have this then Right Click on the Renguard in your taskbar and choose to 'Maximize' it, this fixed TSKHavoc's issue."

Maybe this will help you.
