Hi Guys,

Its about time i joined up here for a chat, discussion and for me to generally submit pleas of help.

Last Winter we had 2 working copies on Renegade, we enjoyed playing online me and the other half that is. Then one day one of the cd's shattered in the computer!!!

We were lucky enough to get another one out of the shops before they all ran out - not a very easy game to find over here in N Ireland at the moment. Anyway today i've discovered the one i've been using has cracked from the inner of the cd

So now i'm down to one cd - no more family entertainment until i spy another cd somewhere - anyway... I've seen talk mentioned of a non cd patch if it exists will someone please point me in the right direction for it.

Also while i'm here, the new maps, i've downloaded them last night, installed them and got them working ok, I take it you can't use a server that doesn't run them - stands to reason i guess, but later on i couldn't get renegade to run at all, I'm not saying it was this installation I think some bastard has hacked in via a pop up but we've had serious problems getting anything to work and i had to reinstall renegade 3 times today the cracked red cd was the last straw!!

Please tell me there is nothing wrong with the maps and i can insert them again when ive got this pc playing fair again.

My advice: Buy a new CD-ROM drive that doesn't eat CD's.

hey there

You can go on servers that dont use the maps, you just cant use the maps on them ^^

i cannot think why it may be crashing but imsure someone else will answer you that.

the no CD crack can be found here,
http://www.beaconpedestal.com/nocd/djllaptop_renegade_1037_nocd.exe

ive had this work for me before when i couldnt find my disc's

insert disc one and let auto run start..

hit play..

and when it tells you insert the data disc.. just hit cancel..

it should bring you to the menu..

not sure if its just a wierd bug on my comp or if it will work for every one lol

if u have a DVD burner..

go to <http://www.download.com> and search for an app called alcohol 120%

download the free version cause it will never go bad on you and u can keep it for good..

and this lets u back up all games..

you can back up the data disc and never need to put in the disc again..

not sure what the no-cd crack other ppl use is

but i use this app to back up all games i need to use a disc to play

(edit)

that or try amazon.com.. the games goin for like 4\$ usd..

that worked for me, before i got the no-cd patch.

Anyway if you were more active in the community and i knew of you i would send you an ISO, but you havent been around, so no.

if you have renguard installed you need to rename the no cd patch to game2.exe NOT game.exe

I've had 3 copies of ren and all 3 have shattered in my cd-rom. Its happend to quite a few people.

I've just bought ren again off ebay because i can't find it anywhere in london either.

But i know im going to make a copy of the ren cd before i use it too much this time

You people need to take better care of your discs... CD cases and CD holders work wonders

The problem is that EA uses/used cheap materials for the CDs.

First thanks for the tips, i've not formatted yet so i'm still around for now. I'll certainly make good use of the information here and if only I knew about it before the second one shattered, I don't think we can use the same disk online at the same time, let me know if i'm wrong.

As for us taking care of cd's, when the first one shattered and found out how obsolete Renegade was getting I've handled the discs with kid gloves. So its definaltey nothing to do with the owners of the discs its obvious its the quality, maybe the us versions are better.

Oblivion - you are just right not to divulge anything to anyone unknown, my personal history is as follows,

Only got into Renegade a little before xmas last year, really enjoyed it as a "Noob" but since then shit happens, my partners father died and i had a stressful summer, online gaming fell to the wayside and in terms of hours played i'm probably still classed a "noob" but I don't care, i love the game, I can kick ass when i want to. I'm maybe a crap shot but then again i'm 38 and a mother of 2 studying for a university degree so i'm usually v knackered and have turned to renegade for some lite relief.

So when someone calls me a noob and then my rating at the end of the game is far higher than theirs is, why should I care? I don't, i'm there to enjoy playing away and i don't take it so personal as some of the youngsters out there do.

That said, Iso's are something my fella knows that much more about and because of the problems with downloadable games with multiplayer passwords we don't really bother, we pay's the money and enjoy the game.

Doesn't stop him trialing a game though

first rule of first person shooter games:

every one is an asshole lol

most are under the age or 18 and don't know shyt from Shi'ne

stick to mmorpgs if u want the "nice" crowd lol

just ignore them!

I just wrote to EA since it was in warranty.

I'll keep the letter for a while.

Cee100maybe the us versions are better.

maybe so, my three sets arent even in their cases. They are sitting on the table next to a 50 gallon fish tank. (that means it will get all kinds of crap on it.)

My Renegade CD seems to have stopped working also, I don't have a clue why... Can anybody

give me any idea as to why this is?

What a familiar site I must say the second one didn't go all the way and shatter just cracked from the centre out.
Tried getting a no cd crack, ran it and it worked perfectly except it screwed with Renguard and now I can't get REnguard to play

Subject: My Renegade cd is bust

[View Forum Message](#) <> [Reply to Message](#)

You have to install the no-cd crack first, then Renguard.
