I am trying to install Core Patch 1 on a machine running Windows 98 SE. Whenever I try to install it it says, "Verify Of New File Failed. Possible Internal Error." The file it crashes on is data\always.ger. Thanks for any help in advance!

when im in instalation. im getting damn near to the end but a window pops up labeled (this was through the Regedit instalation, as it never was able to instal through just the renegade files.)

C:\Westwood\Renegade\language.exe

if you experience problems with renegade <e.g. renegade wont start, always.dbs is missing, wrong language>, make a note of what this program says and report it to Blackhand Studios.

Language ID=0

English Detected

Removing old always.dbs

Removing new german always.dbs

Removing new french always.dbs

Renaming new english always.dbs

Now renaming scriptsx.dll to scripts.dll

error 17

it stops there and i cant even play renegade anymore, cause renguard wont let it load.
please email me, need help fixing this.
