Hi there,

Well first what happens... I installed the cp1 serverside patch, put all the settings right and everything worked fine. Then one day i changed to Renguard Pure mode for a CW and now i get all the time : Fatal Error primary IP not found. I tryed to change all the setting but what ever I do i get this error

so.. any ideas what i can do?
thx ch4ever

Disable the gamespy emulation, or set Gamespy_IP = <ip> in your brenbot.cfg file.
