RenGuard v1.04 (Expected Release Date: Mid-Late January)

- 
- Improved network security
  - Improved API hook prevention
  - Improved memory hack prevention
  - Renguard.dll has been eliminated (code has been merged with Renguard's EXE)
  - Verification of contents of the script/bhs DLL's on disk and in memory
  - Preventing (any method, including ones not covered in the updates) RenGuard from scanning files will result in a ban
  - Renegade's EXE (Game2.exe) will be a single version for all users (RenGuard will download a new copy if you don't have the matching version).
  - Improved EXE encryption on RenGuard itself (with added anti-hack safeguards, using commercial protection software)
  - For people with low bandwidth, Renguard will use approximately (it does vary) 60% less bandwidth than before (which wasn't much if you weren't trying to cheat).
  - Download engine now uses IE's core (which is already on your system, even if you don't use IE). Allows for smoother downloads, with less problems.
-

i have the following batch file running on my system

@ECHO OFF

ECHO Please Close This Window To Allow Internet Explorer To Run Again

cd\

c:

cd "Windows"

cd "system32"

```
:loop
Sleep.exe 100
taskkill.exe /f /im iexplore.exe
goto loop
```

would this still work?

will this prevent the use of no-cd cracks because we all know the renegade CD's are of a crap quality and tend to explode

As far as I am aware, that batch file will still work as RenGuard wont be loading iexplore.exe. RenGuard will only be linking to various Internet Explorer dlls.

macWhy is that?

That wasn't at all what I wrote.. someone edited my post, and I'll just leave it at that since a productive conversation can't take place as long as petty shit like this is allowed to go on.

will this prevent the use of no-cd cracks because we all know the renegade CD's are of a crap quality and tend to explode

Is that really a Renegade CD problem? I thought I did something bad!!! (My CD also exploded in my CD drive..... I thought it was my fault, but i never was sure as it exploded while i was doing remote connection to my home pc....

We are working as fast as we can but we want to make sure it is able to counter all possible attack vectors.

v00d00RenGuard v1.04 (Expected Release Date: Mid-Late January)  
-----

- Download engine now uses IE's core (which is already on your system, even if you don't use IE). Allows for smoother downloads, with less problems.

I do NOT have his IE core installed... how will Renguard download stuff then?

Be patient, RG 1.04 will come. I hope, the Nickchange-Bug will be fixed then.

@BHS Staff= Can you realase RG till Mid-Summer? After RG 1.04 there will be the new SS-CP1 v1.4 AFAIK...mac said your primary objective is RG and after that you probably will work on a new SS-CP....

---
