"Good-bye!

Greetings everybody, As you have probably noticed, we have often had downtimes. This was because it was so hard to keep this site up! But now we are sorry to inform you all, that SuprNova is closing down for good in the way that we all know it. We do not know if SuprNova is going to return, but it is certainly not going to be hosting any more torrent links. We are very sorry for this, but there was no other way, we have tried everything. Thank you all that helped us, by donating mirrors or something else, by uploading and seeding files, by helping people out on IRC and on forum, by spreading the word about SuprNova.org. It is a sad day for all of us! Please visit SuprNova.org every once in a while to get the latest news on what is happening and if there is anything new to report on. As we wish to maintain the nice community that we created, we are keeping the forums and irc servers open. Thank you all and Goodbye! sloncek & the rest of the SuprNova Team"

What the fuck... Just my luck. I had just found a 2 rare star trek game image files on that site yesterday and started downloading them. The whole site shuts down before they finished. Now that is bullshit.

oblivion165Most likely the tracker is not suprnova

I don't have the Torrent file anyways. Or dont know where it was sent. I just open torrent files when downloading instead of saving them.

Edit: Nevermind I found the tracker for one of the torrents , Which wasn't suprnova. I still need the Away team tracker.

Suprnova and such are only guides. They have no effect on the actual download of torrents.

Suprnova and TorrentBits are gone. They claim they couldn't find admins to maintain the sites or stuff, but I don't know...there's somekind of Anti-warez program going on out there. Finlands biggest Bittorrent site, Finreactor, was shut down, and the administrator's PCs were confiscated. Charges will probably be pressed against the most active uploaders too, but things in the court always take time, especially when there's a lot of information to deal with.

It worked pretty darn well, many warez-sites were closed down voluntarily when people realised that spreading copyrighted material over the Internet actually isn't legal.

This happened about a week ago, and was all over the news. Things have settled down since, but people are thinking twice (or more like 10 times), before using Bittorrent for illegal files sharing now...
