I was banned supposedly for having the repair hack in pistol server and non00bys server. I never downloaded this hack program. I do have renguard. I love laying renegade and have no life otherwise. Yes, its sad.

1. Do you have a list of the files I should have, or is there a way look and delete these hack files?
2. Have people really hacked renguard to the point that they can put in new cheats? 3. Can updates of rengard be posted to exclude new cheats?

the real nickname: Sutinjust

As long as you can run RenGuard, you don't have any cheats installed. It reports anything and lets you not join a server.

RenGuard is blocking all cheats that are available via public websites, but there's an update coming that brings more security.

I only run renguard with my renegade. These server operators would kick me if I didn't. However, I've been banned none the less. As Daffey the duck says ... disssspicable! My clean character has been challenged!

Thanks for the reply. Sutinjust

There really is no excuse for not having Renguard installed (all players). However if like myself, the young ducklings in the family hijack the P.C. Then you will end up with lots of files for Skins, Super Guns, Odd Vehicles + who knows what else.

I too ran R.G. or so i thought as a pure programme. R.G. caught me out. The ducklings have been sent to the pond for drowning + re-birth. They are now back as mature swans who cannot cheat + cannot or will not add extras.

---

I recommend full unistall of Renegade, (regedit) in the Run box after control panel emptied the hard drive but a closer examination in the West wood file found some remnants of Renegade. After removal of those files + a clean installation of Renegade my game works AB-FAB.

It is with great pride that i sit back as others are kicked from R.G. protected sites for cheating knowing that it is highly unlikely to be me in that predicament.

Finally to all that read this note, install R.G. by the book and have a great time particularrly in New Maps.

Cheers SPLASH 1st

Thanks for the reply. Yup I've spent enough time playing the game. The (grown ) kids may have found a way to kick me. :oops: Anyway I was kicked /banned by my rengard last night while in a game with the message that my data file always2.dat was corrupt. Therefore.... I have (i think) deleted all the renegade files though some are difficult. I've had to power down the computer several times to delete all of them. Just searched for "renegade". (Amazing how many files were left after the uninstall program.) Now I have to weigh whether I want to regain my addiction by reinstalling this great program. You'll know what I decided when/if you see me back as....Sutinjust  
Thanks again, good insight!

Well, people do make false accusations. It might have been that someone without Renguard was using the repair hack on your tank. On pistol there were 3 kill hacks and 2 bigheads but no mod to get rid of them all yesterday. wouldn't be surprised if someone thought you were cheating.

if you talk to the server admins you should be able to get this resolved - pitch a fit enough to clear your clean name and i am sure they will take notice -

RenGaurd is great - a few glitches in it - i am sure they are workin hard on them - everything takes time - considerin they built this from scratch - i think they are doin a good job

no its not

i got banned from renguard for supposedly being involved in a brenbot leak

bullshit

total bullshit
