Hit enter on the FDS console, sometimes a message is still on the console, this will cause some problems :S

If that dont fix it, check the remote admin password and remote admin port, maybe change this into something else and take note that the remote admin password MUST BE exactly EIGHT ( 8 ) characters long and it CANNOT start with a number.

thats is a bug  
the bot ignore users with !  
he only repleis to users with @ or +

---

try right click on your name on IRC and De-Op and then Op yourself, this

---

sometimes works on IRC Servers with services using extended userlevel characters or so like + %  
@ & ~

---
