Funny, I got it within a week of its release, and my box says 2002. I think Amazon is off quite a bit... I think Homey is close if not right.

I truly don't trust your judgment as to what's interesting and practical. I mean, you support the WWI mod. 'Nuff Said.

The beta was only functional through WOL and that was disabled about a week before release. It's not that much different from what we have now.

I'm not going to upload it for the following reasons:

[list]

1. I'm not going to spend 4 days uploading on my 128k up connect.
2. I dont have a 500mb of space online.
3. I agreed to the NDA which stated the files were not be given to anyone

[/list:u]

I still have my original beta disk, too. I was thinking of extracting some of the .mix files for the maps and bring back memories, such as Walls with all sand floors.

I got mine the week after the release, but my comptuer specs at the time were so crappy it wouldn't even start the installler for it, it was a complete peice of crap. So i had it and just looked at it for months until i got my new comptuer. I can time the exact moment my rapage of renegade began
