Renguard is pretty much useless now. Cheats have been used even with it running so why have it anymore????

its true, Rengaurd can be bypassed and one of my ingame friends has done it to prove it to me. Captain knows who im talking about but i wont divulge his name as he is the only "full-proof" anti-cheat out there. He knows it all and who uses them.

Well, if we know who cheats with RenGuard then they can be dealt with and prevented from logging into the network. Can you PM me the name?

not the full serial though
by law or something the last area of the serial is encrypted, to which not even they can see.

Notice how it's always "a friend of mine" who can bypass renguard, or "some guy"...never any names, or specific servers, games, dates, or anything even close to evidence. Its rumor spreaders like these that are more pathetic than the cheaters themselves.

Also notice that anytime someone is caught cheating, its always "my brother was on my computer and used cheats". Grow some balls and stop lying n00bs, you will get farther in life.

while that may be true for most people who say they've seen renguard bypassed, it isn't always true...

We fixed the exploit ghost911x was using. v00d00 is also deep into the process of RenGuard 1.04 which will stop many more potential exploits. Yes, it's possible that there are a couple of people bypassing it, but no one has yet bypassed the RenGuard network ban.
