Tip: Include a preview of the map, so people don't have to waste their time downloading stupid maps.

Yeah, I know. But I too will soon start add pictures by hand to the HTML pages. Kinda sucks in a way, maybe I should look for a download script we can both use.

Go to the bottom, that's a example of what you can do, like you can use tables to show screenshots. I'm only leaving it for a while, I don't think I'll really use it.

Nice, if people need to have a map ile tell them where to go.  
Myself i dont like playing Other maps then the original anymore.  
Unless more people would play it but overall its nice.
