[View Forum Message](#) <> [Reply to Message](#)

My Renegade crashes everytime I try to exit it.

I don't remember this happening before ReneGuard so often, maybe that could be it? Does anyone know how to fix this? KTHX

ive had that happen too..

my comp will totaly freze.. cant go to desktop at all

W-key+m/d dont work tab+alt dont work

i know its rengaurd.. like i can sum times hear stuff goin on in the desktop.. like an I.M or sum thing.. just cant see it...

Run the game in windowed mode; you will see an error message and will be allowed to close it.

To fix it, run the game at the same resolution as your desktop.

Should fix it

When it usually does that, I put the PC on standby, then it'll take you back to the desktop

thats not a RenGuard issue :rolleyes:

its caused by SP2

Subject: Renegade Crash on Exit?

Posted by [JPNOD](#) on Fri, 31 Dec 2004 14:14:19 GMT

[View Forum Message](#) <> [Reply to Message](#)

Yeh, its sp2

Other crashes are caused by just Renegade btw.

If u want reduce the chance of Renegade crashing
play on 640x400 16 bit.

Sn1per XLWhat is SP 2? My renegade freezes when I try to connect sometimes.

Windows XP service pack 2.

Mine crashes on exit. Before I exit , I just minimize and close when outside of the game.

It is NOT a SP2 problem, it is actually a scripts.dll problem, but think whatever you want.

It really pays to have windows ME..

it sure isn't a service pack problem, because windows ME does not get service packs and suffers the same crashing. run the game at your desktop resolution, like most game developers recommend in their release notes.

id bet on the res causing the crash..

i run at 1600 by 1200.. and switchin back from w/e i have ren set it would cause it..

ATI 9600 pro (i miss the cool Nvidia desktop features!)

F8 then type "EXIT" from ingame. It will exit Renegade without the crash.

My rig did the freeze thing to, but Crimson told me about the F8 thing and I haven't frozen since.

[View Forum Message](#) <> [Reply to Message](#)

I doubt it. The only thing that causes that kind of crashing is a faulty scripts.dll file, and this didn't start happening until CP1 was released with a widely distributed scripts.dll file.

I have CP1, Scripts.dll 2.0, Renguard, Windows XP Pro SP1
and this bug has never occurred.

Could just possible be conflict of software certain people have.

CrimsonI run Renegade at 1280x1024, same as my desktop and I get the crashing. I'm pretty damn sure it's SP2.

Same colour depth?

might have something to do with SP2 but it won't be only that.

[View Forum Message](#) <> [Reply to Message](#)

i dunno SP2 has to do with firewalls and all that..

id figure that it would mess with u BEFORE u got into the game.. not while gettin out of it..

[View Forum Message](#) <> [Reply to Message](#)

What really bothers me is the fact that so many people have problems with SP2, some are really severe, but I have zero problems with it. Although, my Renegade does crash on exit sometimes, but I doubt that's an SP2 issue.

JPYeh, its sp2

Other crashes are caused by just Renegade btw.

If u want reduce the chance of Renegade crashing
play on 640x400 16 bit.

What a lame excuse to fix a simple problem. Only people who are stuck in the dark ages of graphics can bear looking at something as bad as that.

[View Forum Message](#) <> [Reply to Message](#)

flyingfoxBut with that reso you can take movies with fraps..

Uh, yeah, only if you have an ancient piece of shit.

I can record 30 fps videos with fraps on 1024x768 full detail in Renegade.

I have noticed that if you click "Quit" at the bottom of the menu instead of hitting "Escape" at the main menu, it crashes less often.

But I have been running with the Core Patch for quite a while and the crashing didn't start until after I upgraded to SP2.

Subject: Renegade Crash on Exit?

Posted by [icedog90](#) on Sun, 02 Jan 2005 02:07:50 GMT

[View Forum Message](#) <> [Reply to Message](#)

I never hit escape to quit, maybe that's why I get it way less often.

Subject: Renegade Crash on Exit?

[View Forum Message](#) <> [Reply to Message](#)

Crimson

But I have been running with the Core Patch for quite a while and the crashing didn't start until after I upgraded to SP2.

Same here. It started after SP2 was installed. The f8 thing works fine though.

[View Forum Message](#) <> [Reply to Message](#)

The final Core Patch change to scripts.dll and the final release of the Core Patch both occurred at about the same time most people downloaded and installed SP2. The occurrence is rare, therefore most people blame it on SP2.
