Its probobly because you havnt finished the configuration. Another reason is that you might be clicking on the wrong shortcut. These may not be the exact reason why but there is nothing wrong with your game.

1. Go to control panel
 2. Click on add/remove programs
 3. Remove Renegade
 4. Make sure all rengade files are gone, including skins, maps, etc.
 5. Reinstall
-

This worked for me maybe it will work for you.
