I got the Blackbox shell for Windows, and I have some troubles understanding how to use it.

How do I add new icons? I have the My Computer icon and the Notepad icon, how do I put in more?

Help will be appreciated.

this has fallen to the bottom of the page, so I'll bump it...

Does everyone here NOT have blackbox or what?

It's a shell replacement for windows's desktop(explorer.exe). I looked into different ones but none was really simple i came across so i gave up on replacement shells.

err, mods, I don't see why this should be in technical support, it's not related to Renegade, just Windows in general...
