When I got home today and tried to load up Renegade it didn't work. It brought up the screen where Rengaurd loads and says "click renegade to play". So I click Renegade and it brings up the same screen. It just kept looping. I unintsalled Renegade and reinstalled. This time the games messes up when I try to install CP1. Right after I installed it, it said my always.dbs was currupted and I needed to download their version of it. I download their version and try to install Cp1. It goes through the installation but when it gets to the end it gives me this:

<http://n00bstories.com/image.view.php?id=1044728021>

I tried to reinstall Renegade again and again it does the same exact thing in cycle and I can't play Renegade untill I get it fixed. Any suggestions?

Try uninstalling RenGuard BEFORE you uninstall Renegade.

Looks like C&C_City_Flying.mix was missing while the patch ran.

Make sure the map exists in your Data directory.

Be sure to update your renegade installation to 1.037 BEFORE attempting to install RenGuard!!!

I figured out the renguard problem. Now there is a new problem. When I re-install renegade and try to load it it doesn't load. It brings up the Renegade load screen then disappears and never

actually loads the game. I have no idea what to do about this. I have re-installed like 10 times and nothing works. any help with this?

Your C&C City Flying seems to be missing, or is corrupt.
