I am having a giant problem with this guy crashing my server, it is running BRenbot 1.40 with CP1 on win32. It's an old bug that crashes the FDS when a player joins with more than 22 characters in name and the auto kick causes the crash. I thought was fixed for BR 1.4. I have tried to run patch 0001 to fix this, but he is still doing it.

joined the game

I am also getting threats like this

Any help from BHS would be giantly appreciated. Also any server owners want to add this guy to your banlist please do so to help me teach him a lesson.

The long name exploit has been never addressed. Other exploitits have been fixed in SSCP1 though.

I banned the user connected to that IP from RenGuard.

Anyone crashing servers is going to be banned from RenGuard. Contact me directly for more details.

I don't allow server crashers on RenGuard, and this seems a reasonable method of punishing them.

Although this is a great punishment, this will not help my situation, I run my server in partial renguard mode. He only needs to connect to the servers for a couple of seconds and his work is done, RG takes 10 seconds to kick non-users. He has now threatened =EA= clan that if they ban him he will do the same thing to them. Is there a more substantial fix for this, can you remove the long name kick or fix the bug?? I am only getting attacked with a full server, and it's not me he is hurting, I do this for fun, it's the server full of people who get pissed. And yet more and more reasons for people to leave this game. That's why I am pissed about this guy.

DanDan was banned because of the server crashing, not before he crashed it. His clanmates were banned to put pressure on him to stop.

Anonymous 109thGW membery do u not play 109thGW? is it because we r 2 good 4 u? just cos 1 of our members pwned u, u ban him! he does not cheat, and never has. so it turns out that ur so scared of being owned by 109thGW that u avoid wars with them and ban their members from your server!!!!!!

YY  
YYYYYYYYYY

btw, i also know that you plan to hack his pc, that's illegal u know!  
so GDE is a clan that has no laws and does not obey any laws.  
i think ur all sick.

I believe the member banned in question (GothMog, I believe) was banned because of his clan members crashing our server with the long name (in your case, yen) glitch.  
Maybe, you all will be unbanned after all is said done.

If I see no crashes for this reason for a week I will lift the bans, and consider this over and done with.

Thanks guys, glad we sorted this out and sorry for the trouble any of us caused ^^

Mac, since we sorted out the problems and they've promised not to do it again could you unban 82.38.104.149 from renguard?

They know what they did was wrong and are sincerely sorry for the trouble they caused, I will give my own word that they will NEVER do it again, if they do you can ban me from renguard too, and ill uninstall the game and never play it again, thats how much faith i have in the fact they wont do this ever again.
