I was logging onto WOL with the wrong nickname, so i changed it and logged out ready to restart renguard, as i was about to restart renegade the CP1 installer popped up which had me a little confused because i already had CP1, but i let it run anyway.

As it starts to patch i get the command prompt window poping up, and it gave me this error:
If you experience problems with renegade (e.g. renegade wont start,
always.dbs missing, wrong language), make a note of what this program
says and report it to Blackhand Studios.
Language ID = 0
English Detected
Removing old always.dbs
Removing new german always.dbs
Removing new french always.dbs
Renaming new english always.dbs
Now renaming scriptsx.dll to scripts.dll
error 17

I didn't have any problems with renegade before, nor when i installed CP1 the first time.

Any help would be much appreciated.

Yea, I had this error, after that bit, CP1 has fully installed anyways.
How I got rid of it you may ask?
Re-installed Windows
