Host a server and you can adjust the specs of the cars eg, weight, and wheel length (cant remember the real name) and thats the result. And the colour is just a skin

---

snipefragHost a server and you can adjust the specs of the cars eg, weight, and wheel length (cant remember the real name) and thats the result. And the colour is just a skin

F8 or ~ then edit\_vehicle

BTW is that the tutorial level?, it seems familiar...

The map= brand new CnC Land

Has some crazy ass jumps on it thanks to ACK for that. And I had a little bit of fun with the edit vehicle command. Also the hummer has a Gold.Grey skin as do all my other GDI vehicles. And for some reason when I tried doing a barrel roll the third time OVER the barracks it got stuck...
